

Little Foresters Crèche Clinical Waste Disposal Policy.

Clinical waste is all waste containing any bodily fluids or medications, e.g.: tissues used for a child's cut or graze, nappies, plasters.

- All clinical waste must be enclosed in the bags provided in the nursery/playgroup/crèche toilet.
- Waste must then be disposed of in the yellow bin in the nappy change toilet.
- Classrooms may use other bins as long as they are clearly labeled "Clinical Waste" and are emptied into the yellow bin.
- The yellow bin will be collected monthly.
- Nappies may be disposed of in the nappy disposal system as well. The bags must then be disposed of regularly in the yellow bin.
